

Dear Mr. Aziz ŞASA,

I would like to express my sincere thanks for taking your time to give us a presentation on the ITU-T workshop on disaster relief related issues at Istanbul Technical University on 11th December.

Around 70 experts from six countries including Turkey and Japan joined the workshop and discussed their activities and experiences in the case of disaster. These results were also discussed in the 3rd meeting of ITU-T FG-DR&NRR, which was also held at Istanbul Technical University on 12-13th December. Some of the results might be included on the ITU-T standards documents in the future.

Attached is the draft meeting report of ITU-T FG-DR&NRR meeting including the workshop. Please let me know if you have any comments on the report.

Thank you again for your presentation. I hope we will colaborete further in the area of disaster relief related issues and for global standardization activities.

Best regards,

H. Imanaka, NTT
